I believe the children are the future, - teach them well  
and let them know - things may be all shit right now, -  
but it gets worse when your old - Happy meals and  
Easter bunny, - great moments indeed - Enjoy it now  
while you still can - 'cause I believe - I believe in  
miracles - and dreams can come true - especially the  
ones - where your teeth fall out - or you're naked at  
school - even sleeping brings us pain - we never get no  
relief - But that's how it's meant to be - that's what I  
believe - What ever happen to trust? - come on people -  
It's what we need - Stop confusing the issues with facts -  
'cause me for one, - I still believe - I believe in the  
written word - if it's on paper it's true - it's all gospel as  
far as I'm concerned - if somebody wrote it - it's good  
enough for me - why be so suspicious of the ones - who  
tried to keep you informed? - they give you the things  
you need - that's why I believe
