"If The Government Could Read My Mind"

Visit "[If The Government Could Read My Mind](#)" on MotoLyrics.com

Baby I'm more than a little concerned you see - about
the New World Order conspiracies - And the covert
spreading of deadly disease - They've got earthquake
machines and UFO's - and black helicopters wherever
we go - But I forget them all when you are with me -
They can telepathically read my mind I'm not scared of
what - they'll find - Let them do what they're gonna do -
'cause if the government can read my mind - they know
I'm thinking of you. - They've got secretly funded
internment camps - and biological warfare labs - But
when you look at me they all don't seem so bad -
They've got Martian traded technology, - and mind
control psychology - I'll let them do what they wanna do
- 'cause if the government can read my mind - they
know I'm thinking of you. - I could stockpile food and
join a militia - but I'd rather stay at home and kiss ya -
Let them do what they're gonna do - 'cause if the
government can read my mind - they know I'm thinking
of you. - If the government can read my mind baby, -
you know it doesn't matter what - they find, 'cause if
the government can read my mind - they know I'm
thinking of you.
