For all those that are feeling way too fed up inside Now
here's a celebration
of failure and losing Like to put a shout out to all y'all
far and wide Sorry
people but this is the way it's gotta be I know, I know, I
know, I know we
are pushing the parameters to a brand new low The
end is near there's lots to
fear No such thing as a good day is what I'm told Let
the bad times roll The
grass is never greener on the other side I'll stay right
here and frolic in
the dirt and gravel Where's the love in this room? I feel
teary eyed.
Between you and me I don't think it's ever gonna
change Descend, rear end,
offend a friend It's wise of you to run and hide from
what's around the bend
The end is near there's lots to fear No such thing as a
free lunch is what
I'm told Let the band times roll Up to me I'll embrace
them happily let you
people know I'm not foolin' come take a ride with me
down to Riverside show
you what it's like to be coolin' Life's gotta be a little
better overseas
whwre everyone's drivin' a Mercedes unsatisfied with
my mailorder bride so
much for my last attempt with the ladies Listen to
nobody this is the way I
think Tell 'em all you're gonna live at least until you're
forty Just be glad
you're only one shade of blue in the face Wake up
smell the shit and think
that everything is great I know, I know, I know, I know
we are pushing the
parameters to a brand new low The end is near there's
lots to fear No such
thing as a good day is what I'm told Let the bad times
roll
