Lay down, u can relax. No phones, turn off the fax.
The day is over now the night has begun
I've done the things that you hoped I would
Love is good

5 o'clock and you called to say that you're coming
home
Silly weekend still 48 hours away
I've been thinking that maybe
we might need a little time alone
The door is open and I'm prepared to
How was your day? I'd say, my lover
Well I still got a lot on my mind
Hey its ok, maybe you'll discover that
it's all about taking our time

Lay down, u can relax. No phones, turn off the fax.
The day is over now the night has begun
I've done the things that you hoped I would
Love is good

Bubble bath is fun for one but really meant for two
A million kisses, saving every one of 'em for you
To get it started, bring that one to five
and move it up to ten
Broken hearted, never again

Don't need no excuse to feel lose at a party
because I'm in a private state of mind
Waiting for you to come thru and join me

Lay down, u can relax. No phones, turn off the fax
The day is over now the night has begun, lets get to
work and baby, time for some fun.
Hold on, its moving fast.
This is all about our love that we built to last.
The world can wait now, its one on one.
Said you can and you understood love is good
Love is good

We came tonight together

the stars have never shone so bright
This is the way it should be
One night for you, you for me
All thru the night

Lay down, u can relax. No phones, turn off the fax.
The day is over now the night has begun
I've done the things that you hoped I would
Love is good

Lay down, u can relax. No phones, turn off the fax.
The day is over now the night has begun
I've done the things that you hoped I would
Love is good

Hold on, it's moving fast
This is all about our love that we built to last
The world can wait now, its one on one
I said you can and you understood
Love is good
