Na, na, na, [unverified]

U238 is in the atomic sea
For satellite hatred she'll melt a city
And the earth will lie wrapped in a nuclear curtain
No one will escape that seems for certain
(And I go)

U238 turns to U235
What a great party we're all gonna die
Big black curtain comin' down on me
And you can't phone back from eternity
(Oh no, and I go)

Ooh, whoo, ooh
Don'tcha worry, little angel
Ooh, whoo, ooh
Don'tcha worry, little angel

Engage the enemy, engage your heart
Lock in the computer and blow him apart
