Backfilled trenches bury cancer intensive dreams  
In razor wire orchards and bar code reefs  
(Where) Primary extinction communicates its intent  
On a  
Trajectory of  
Ruin  
Acrid  
Stock  
Chokes  
The Ground  
Renewed  
Concern  
For the strontium 90 offspring

Boiling dust stands in pools of molten glass  
Severe contamination of irradiated dreams  
Nuclear reservations and burial gardens  
Alpha particles stir in the poison breeze

Planting yellow posts  
In the sand  
The trail markers of irradiated dreams  
Trapped in senseless illusions  
Compressed to a state  
Of critical mass
