In my mind
I only see your face
And time will not erase
What I feel for you, feel for you
In my heart
It was always you and me
That's how I thought it would be
Forever and ever
Where do I go
What do I do
After all that we've been through
How do I turn around
Just turn around and watch you go
"Cause baby your love is all I know
The touch of your hand
The warmth of your embrace
I always had a place
here in your arms
I felt so secure
I didn't need anything more
Where do I go
What do I do
After all that we've been through
How do I turn around
Just turn around and watch you go
"cause baby your love is all I know
Tell me how
Can you walk away
and find somebody new, somebody new
somebody new
When I can't see myself
with anyone but you
Where do I go
What do I do
After all that we've been through
How do I turn around
Just turn around and watch you go
"cause baby your love is all I know
