English translation

Take a big, deep breath -- light floats in the sea of the
sky
What ideas are born in that dazzling place?
Fight to change fate and leave behind this endless
path
Don't just wait for a future that can't be changed
Hide the sad colour of your eyes and laughLet me hold
you now -- my scars throb softly

Don't forget to be brave, receiving many dreams...
From now on I won't be defeated again as I walk
through
lifeTo think I understand all the things of the world,
that's foolish
Over a puzzle I hate, I won't repeat these battlesI'll
protect these paths, I want to live with pride.
.. from the bottom of my heart I wish for happiness
Return light to life, and next, meet by chance with life
Meet with a smile, and become friends as we embrace
the same dreamNow believe in a planet free from
fighting, surely
Everyone has soul, dancing in the many dreams
they've painted
It's freedom, an unseen dance"Ah,
release me from this pain"... I can hear that voice
Right, the time approaches when life here will become
lightI want to hold you now -- my scars throb, so
Now soldiers can walk through the many dreams
they've painted
It's freedom, to the limits of fate
