Heavy eyes can't face it  
Every line has taken me on  
And in my heart i'll fake it  
Since you left me standing alone

Hold back the night  
Till the moment, you're in my arms again  
Till you're back again

Hold back the night  
Oh i'll never face it  
Hold back the night  
Yeah, yeah  
Hold back the night  
Till you find your way back home

And your words keep turnin'  
Through the night, i said to myself  
I know, i know we can make it  
Through the cold winds of truth

Tell me not to worry  
All i want is everlasting love.  
Everlasting love

Hold back the night  
Oh i'll never face it  
Hold back the night  
Yeah, yeah  
Hold back the night  
Till you find your way back home
