Born to Sing

I was born to sing forever born to sing to you
And as long as were together
Theres nothing else I want to do
I was born to sing forever to me that's everything
And until the end of time I know I'm born to sing

When the spot light hits my face I'm alive
The stage is were I'll always survive
The only place that I want to be
When I hear the audience coming in
I feel the magic start to begin
And then I know you've come to see me
When I hear the maestro strike up the band
And the drums begin to play
The only way that I understand to live my life each day

I was born to sing forever born to sing to you
And as long as were together
There's nothing else I want to do
I was born to sing forever to me that's everything
And until the end of time I know I'm born to sing

Key change

I was born to sing forever born to sing to you
And as long as were together
There's nothing else I want to do
I was born to sing forever to me that's everything
And until the end of time I know I'm born to sing
