You stay at home  
All on your own with nothing but walls to talk to  
You never go anywhere  
You say you've nothing to wear  
So you keep all your troubles inside of you

There's something hidden in you  
And you keep it out of view  
You shouldn't feel any guilt  
Or have any doubts  
You gotta let yourself out whilst there's something left  
of you

Hey baby blue  
Don't hide your troubles inside  
I'd sure like to know you  
And there's so much to show you on the outside

Somehow I know that we are gonna get by  
So stop acting like a lady come  
And cry like a baby on the outside  
(Outside)  
I know that the weather is fine  
(Outside)

I know we're gonna be alright  
Somehow I know that we are gonna survive  
So stop acting like a lady come  
And cry like a baby on the outside  
On the outside

You think you're a freak  
And you're afraid to compete  
In a world that you thinks got it down on you  
You're a closet queen  
You think it's obscene  
To let the people see what's deep inside of you

I know what you're going through  
But what you are is nothing new  
So don't feel ashamed

'Cos you're not to blame  
Role up the blinds and let the sun come shining  
through

Hey baby blue  
Don't hide your troubles inside  
You should be glad in the gay  
Nobody cares anyway on the outside

Somehow I know that we are gonna get by  
So stop acting like a lady come  
And cry like a baby on the outside  
(Outside)  
I know that the weather is fine  
(Outside)  
I know it's gonna be alright

Somehow I know that we are gonna get by  
So stop acting like a lady come  
And cry like baby on the outside  
On the outside  
On the outside  
On the outside whole night
