Here i am again, its you and I
Another surfside night.
I can see the waves,
I can see the moon,
But mostly I see you.
With my eyes i see you standin' there,
Without a care.
With my heart i see you wanting more,
Of what love has in store.

I know i want to stay right here.
Right here with you.

When i see you,
In a moment, everything around us falls away
And all i see is you (all i see is you)
And i feel you
Right besides me
And everything familiar now feels new
Whenever i'm with you.
This Is Love

Here we are again
Its like a dream, but this is real to me (yeah)
It happens everyday, when i see your face, the world
just falls away

I know i want to stay right here.
Right here with you

When i see you,
In a moment, everything around us falls away
And all i see is you (all i see is you)
And i feel you
Right beside me
And everything familiar now feels new
Whenever i'm with you.
This Is Love

I know i hear you callin'
You and I are fallin'

I know i want to fall in love with you

And i see you,
In a moment, everything around falls away.
And all i see is you (all i see is you)
And i feel you, right beside me
And everything familiar now feels new
Whenever i'm with you (with you)

And i see you,
In a moment, everything around us falls way
And all i see is you
And i feel you, right beside me
And everything familiar now feels new
Whenever i'm with you
This is Love

This is Love
