All the kids at another show
you hit the bottle and youre ready to go
you got your blood stained shirt from last night
now youre loadee and looking for another fight
pride came first, love came last,
you better watch out cuz death comes fast

death comes fast
youre stuck in a hole
youre out of control
youre wasting away
you better change
death comes fast

dont you know your life wont change
one more excuse its the same old thing
day by day living a lie
wasting away until the day you die
pride came first love came last
you better watch out cuz death comes fast
