City of Los Angeles 2002
The scum fill the streets
While the punks are getting glued
One more empty day and one last fix
The disease is spreading
While the hookers turn their tricks

I know there's more, more than this
My life won't be wasted there's more than this
An empty life An empty day
One more debt I have to pay
More than just come what may
More than just wasting away
There's got to be more
There's got to be more
There's got to be more
More than this

Another homeless man lays drunk in the street
He's plastered every day
And he's plastered every week
And in an alley close by
A young girl is raped
Her virginity is stolen
And her purity dismayed

More, More than this
Then, More than this
This, More than this

There's gotta be more
More than this
I know our lives here
Aren't even worth piss
There's gotta be more than this place
More than just the human race
Gotta be more
