"Time To Go"

Visit "[Time To Go](#)" on MotoLyrics.com

You never meant to stay
You always walk away from everything
And did you stop to see what was going on
You build walls around you every time
You've been running round in circles
You've been blaming everyone

But it's time to go
Cause you've been around for so long
Now don't be a fool just let it go
It's never too late, oh I know

You went to find yourself
But you never looked behind to see what you left
And did you stop to change the world
What are you looking for
Did you find your pearl
Don't you think that oh you're the only one
Who believed in what they said

But it's time to go
Cause you've been around for so long
Now don't be a fool just let it go
It's never too late, oh I know

Now I know what you're feeling
Tell me that with all your reasons
Too waste tomorrow, it makes it alright
Now don't look the other
When are you gonna stay
For just one day

But it's time to go
Cause you've been around for so long
Now don't be a fool just let it go
It's never too late, oh I know
