Something about yesterday night
Keeps replaying
Over over over
You are the sweetest wine
And I'm just a cup running over
And over again.
Because you've got that something something
That's just like me.
I can't put my finger on it
This chemistry.
We agree

We've got the love of a lifetime
The moon and the stars are all in line
We got the thing and it's all right
It's more than love
It's more than love.

You don't worry about me
Cause I've got something that's precious precious
Won't lose it no no.
Your loves a mystery
Page after page just gets better
As we go along.
Because we've got that something something
That's sweeter than words
Least my eyes haven't seen
Nor my ears haven't heard
What I needed
All of my life
It's finally come to me and it's all mine.

We've got the love of a lifetime
The moon and the stars are all in line.
We got the thing and it's all right,
It's more than love
It's more than love.

It's more than love (Celena)

We've got the love of a lifetime we've got the love

(Celena)
The moon and the stars are all in line more than love
(Celena)
We got one thing and it's all right all right (Celena)
It's more than love
It's more than love
It's more than love (Celena).
We've got the love of a lifetime we've got it (Celena)
The moon and the stars are all in line more than love
(Celena)
We got one thing and it's all right it's all right (Celena)
It's more than love
It's more than love
It's more than love (Celena)
We got the love of a lifetime
The moon and the stars are all in line
We got the thing and it's all right
It's more than love
It's more than love

It's more than love (Celena).
