Sign your name on the dotted line
They promised a future, they promised you money
Time goes by, you're still the same
Just another victim of the system

We don't need you! NO!
Try and fight back for all that you had
Now it's too late you're better off dead
Sacrifice to try and succeed
Now you're alone and you're still in need

A career came first, and I come last
Now my future is buried in my past
Struggle for your family, a never ending fight
I've become nothing in my loved ones eyes.

We don't need you! NO!
