If you had a crystal ball,
You would look in it, I know,
You might just catch a glimpse
Of something like a ripple and a whirl.

I love my name!
I love my name, I love my name!
Hurray, hurray!
The party's over, we can stay!

Laughing at your tire tracks
Take a back seat, wait for ten and drive
We could be animal or vegetable or mineral you know

I love my name!
I love my name, I love my name!
Hurray, hurray!
The party's over, we can stay!

The time will tell
For now you might just sleep to wake,
So when you stare
I'll say to the world, I love my name!

Happy is the wise man,
Break a bone and dig a grave!
Put your ear against the Earth,
I hear them say: I love my name! I love my name! I love
my name!

I love my name!
I love my name, I love my name!
Hurray, hurray!
The party's over, we can stay!

I love my name!
I love my name, I love my name!
Hurray, hurray!
The party's over, we can stay!
