I provide a state of mind [2x]

Today is the day we take it deep again
Just some blow your mind state of music
Back to when it was more than a sound, more than a
fashion statement
More than a cool thing to be doing
Back when if you didn't know the dance of the week
We could not care less

When electronic music was something so underground
It never saw the light of day
When it was raw
I provide a state of mind

Today is the day we take it deep again
Just some blow your mind state of music
Back to when it was more than a sound, more than a
fashion statement
More than a cool thing to be doing
Back when if you didn't know the dance of the week
We could not care less

This is a middle finger to all the people that feed the
hype
All the people that feed off the hype
This hype is the other way around

I provide a state of mind
