Christina, where are you now  
I long to be with you, please tel me how  
How I can reach the stars in the sky  
To be by your side  
It seems like a million nights  
Since we walked midst the starlight  
Heaven seemed so very har away  
Unlike today  
Now as the day draws to a close  
And the grave invites my repose  
I know I'll be with you again  
At heaven's end  
Christina, the stars in the sky  
Guide my thoughts to palaces on high  
Away from the loneliness of the night  
Into your light  
Soon after this body I have fled  
No more tears then shall I shed  
For I will be with you, my love  
Midst the stars above  
Is there really no end to love  
Is there really no death for us above  
Will there be all of eternity  
For us to be  
Christina, wait for me now  
The stars above have shown me how  
How I can leave this world behind  
To be by your side  
Christina, Christina, Christina my love
