"Crystal Eyes"

Lay on the grass beside me, crystal eyes
You know you hypnotize me with your crystal eyes
But I woke when I found out
About your tiny little lies
And I had to face the truth
Just in time you know
Before you made me blue
Comes a time you know
When I will take no more (x2)
So lay on the grass beside me, crystal eyes
You know you hypnotize me with your crystal eyes
Skintight jeans lying on the green
It's only me who sees your tears
And it's time, you know
That maybe I should go
Make up your mind, you know
Before you're on your own (x2)
Lay on the grass beside me, crystal eyes
