I tried to walk it like I talk it
I tried to keep it in a straight line
But you dragged me away

I know that this is gonna get me
But someday I will pay
Someday never ever

A never ending chain of bitterness
You're the judge, the jury and the sentence
Before you send me down
I'm already there

A never ending chain of bitterness
You're the judge, the jury and the sentence
Before you send me down
I'm already there

I tried to walk it like I talk it
I tried to keep it in a straight line
But you sent me away
And I know that this will catch me
But someday I must pay
Someday never ever

A never ending chain of bitterness
You're the judge, the jury and the sentence
Before you send me down
I'm already there

A never ending chain of bitterness
You're the judge, the jury and the sentence
Before you send me down
I'm already there

Already there
Already there
Already there
Already there
