I want to see another world
For me and my child
My old lady, too
Maybe you

If we can
If we get to
I want to see another world
I want to see another world

I think you might see
A great ship up in the sky
Like an eagle, like a stallion
Might be a burning silver wheel

Let you know you can fly
Look up in the sky
Look up through the darkness
I think it might be love

I want to see another world
For me and my child
My old lady, too
Maybe you

If we can
If we get to
I want to see another world
I want to see another world
I want to see another world

When all the sky is darkness
When all the ground you know is gone
How the solar wind she blows
Snowy silver dragon sings the songs

Flying straight up to the sky
Great singing engines sigh and
Drive this metal fragment into time

Let's try to get along with each other

Sister and brother
Father and mother
Everyone's a lover

I want to see another world
For me and my child
My old lady, too
Maybe you

If we can
If we get to
I want to see another world
I want to see another world

Let's try to get along with each other
Sister and brother
Father and mother
Everyone's a lover

Get along with each other
Sister and brother
Father and mother
Everyone's a lover
