

Think About Mutation "Suffer"

Visit "[Suffer](#)" on MotoLyrics.com

give it up we live fast
take a note for the past
talk in sleep that's your way
in paradise you will stay

my fantasies of underground - you're a liar too
are very strange and much to loud - you are not alone
come take the light of emptyness - turn the radio on
enjoy yourself forget the rest - the frequency of dawn

the truth lies still in your face and the radio drones:
suffer...

come or go it's the same
we will die every day
trust me now that's the truth
feel the pain of my shoes
remembering all the days
of quality holidays
moments of happiness
passing like your green dress
come or go it's the same
we will die every day
take your dreams in your hands
at last will be innocence

my fantasies of underground - you're a liar too
are very strange and much to loud - you are not alone
come take the light of emptyness - turn the radio on
enjoy yourself forget the rest - the frequency of dawn

the truth lies still in your face and the radio drones:
suffer...

my fantasies of underground - you're a liar too
are very strange and much to loud - you are not alone
come take the light of emptyness - turn the radio on
enjoy yourself forget the rest - the frequency of dawn
