You used to live next door
Fifteen years old
You couldn't have been more
My how you've grown
It's been so long

You used to pass my way
Missed you one Saturday
You were gone
And I wished you would come back home

(Chorus)
I love you and I just can't
Get you outta my mind (Repeat)

Suddenly my special place
Turned to an empty space
It wasn't warm again
Without my best friend

Now like a dream come true
I'm standing here with you
Your time has passed
You have come home at last

(Chorus)

Now that you're here for good
Check out the neighbourhood
You'll find memories
Hiding behind those trees

I'll take you on a tour
Back to the home next door
Where we can always stay
Forever and a day

(Chorus)
