I could be far across the sea  
Or by myself on the moon oh  
but I know on the radio  
that the song will remind me of you

Pleasure and pain just like everything  
eventually has to end  
but all it takes is a melody  
and I'm suddenly with you again  
so

chorus:  
let it out now, slowly  
so much better off outside our bodies  
They've been waiting for you  
Your presence is gone  
but your power goes on  
cause the song still reminds me of you

(repeat chorus)

Through all the years that we've been  
as it was adn so it shall be  
forever and ever amen

(chorus)
