

## Thirteen Senses

### "Imagine Life"

Visit "[Imagine Life](#)" on [MotoLyrics.com](http://MotoLyrics.com)

Imagine life was a little box  
With a key it's locked from the outside  
Picture life as you wanted it  
Let's not be hard on it on the inside

Some kind of message lies under your skin  
Making its home in the way that you think  
Some kind of distance is bringing you in  
Where you are going now I can't come in

And I see how they all get along with us  
And I see how they all get along with us

Imagine life was a little box  
With a key it's locked from the outside  
Picture life as you wanted it  
Let's not be hard on it on the inside

Some kind of message lies under your skin  
Making its home in the way that you think  
Some kind of distance is bringing you in  
Where you are going now I can't come in

And I see how they all get along with us  
And I see how they all get along with us  
And I see how they all get along with us  
And I see how they all get along with us

Imagine life was your only alibi  
Oh, I decide  
If some kind of love  
Means some kind of life

And I see how they all get along with us  
And I see how they all get along with us  
And I see how they all get along with us
