Some people never change  
And that's who you are  
Left her side for a day  
But returned to her side  
Your jealous taunts at life  
May s-come to you  
To tell you otherwise  
Is tough through and through  
Didn't know a life any other way  
He's only 19' let him go from this day  
If growing up wasn't hard enough  
Without your messages and overwhelming love

But he's got to move away:.hey, ho  
If you love him, then let him go:hey, ho  
Contradictions of his stupid addictions  
May see you there sooner than you think  
If parents and partners are just too much  
All you need is societies touch  
Didn't know a life any other way  
He's only 19' let him go from this day  
If growing up wasn't hard enough  
Without your messages and overwhelming love  
But he's got to move away:.hey, ho  
If you love him, then let him go:hey, ho
