Twinkle, twinkle little star
I need you but you are so far
My dreams are waiting to come true
When it'll happen, I wish I knew

Guide me please, little star
Up in heaven, oh so far
To the places I dream of every night
While you are shining oh so bright

Twinkle, twinkle, little star
Are my wishes very far
From fading to reality
Where happiness is waiting for me

Guide me please, little star
To the place I dream of
Often dream of
In my heart
