Once upon a time, a boy meets girl
Mad in love, against the world
Happy everafter, and that was just because
They had hearts of gold and stars in their eyes
Never made a fuss of where's and why's
Filled the days with laughter
...now why can't that be us?

What's Up with you and me, ss it a fantasy
Something I feel so strong - I can't put my finger on
What's Up with you and me, are we still meant to be
Or will you be the one I can't put my finger on

Once upon a time I thought we'd be
The greatest of loves in history
And I've been waiting for you
But I guess you missed the bus
Now there is still time to make it right
Leaving the past behind tonight
Does anyone know the answer
to why it isn't us?

What's Up with you and me, it's such a mystery
Something I feel so strong -

What's up with us
can you tell me
What's up with us
It should be easy
Is it because
You wanna tease me
Or is it the way you play

What's Up with you and me...
