I called you up again  
on the two way radio, over?  
Over my dead body  
you said laughing at me. over?

Snow falls in slow motion as you go  
Destination San Francisco

You're gonna see the world  
through a brighter window  
You're gonna miss me girl  
when you're feeling low

Easy, Baby  
I'm just joking  
Are you ready to leave?  
I'm sad you said to me  
crying over and over

Snow falls in slow motion as you go  
Destination San Francisco

You're gonna see the world  
through a brighter window  
You're gonna miss me girl  
when you're feeling low

Oh, say when can you love again  
can you love again?

You're gonna see the world  
through a brighter window  
You're gonna miss me girl  
when you're feeling low

San Francisco, I've never known this kind of hurt  
before...
