What you're gonna do when you get lonely someday?
What you're gonna do when you're a memory that's fading
And I don't need you?
Living in this world is hard enough
But I remember when you made it easy
If you can live without my love
There'll be no way back

Don't say you love me - Don't say you need me after
you're gone
Don't say you love me - You know that leaving me is got
to be wrong
I close my eyes - And think of how it used to be
I close my eyes - And you are here with me

What you're gonna do when you're a memory that's fading?
How're you gonna feel when you want me
And you call me
And I don't need you?
Living in this world is hard enough
But I remember when you made it easy
If you can live without my love
There'll be no way back

What're you gonna do?
Living in this world is hard enough
But I remember when you made it easy
If you can live without my love
There'll be no way back
