i walk alone, i walk alone
here are some things i can do without
and i can edit my identity
if i need to seem more mean

i've got a fever i don't need her
united fingers i cant be with her
i've got a fever, i've got a fever

i walk alone, i walk alone
you are something i could do without
well i can shed this skin today
like a watch who's hands i can change
i've got a fever i don't need her
united kingdoms i cant be with her
i've got a fever, i've got a fever

(chorus)
disappearing into the nite
with all the things that made me on time
oh you no longer make me alright
oh you no longer make me alright

i've got a fever i don't need her
untie our fingers i cant be with her
i've got a fever, i've got a fever
