When I wake up
with smoke in my eyes
I just know daylight's wasted
When I wake up
I wish I did my best
Can't forget how you tasted

Can't you see
we're dreaming back through life now
Can it be that no one's really there
no one's really there

Don't you worry
Life is still the same
without trust without glory
Time is with us
Just let me count our days
you know we all got a story

Can't you see
we're dreaming back through life now
Can it be that no one's really there
no one's really there

We're all stuck in a scene
not going anywhere
It's nothing but a dream
no one's really there

Can't you see
we're dreaming back through life now
Can it be that no one's really there
no one's really there
