From hand to hand you bought and sold  
Blood is the shield against the weather  
Became a stone for fear of being melted  
Troubled from the day we came together

When you recover, from yesterday's low  
True slave to traction of pleasure  
I collect the embers as I watch you go  
You left along the way we came together

As you breathe  
As you breathe it to life  
You will lead  
You will lead  
As you stray  
As you stray far from home  
I will believe  
I will believe

Flames of love immerse you  
Cradle and coerce you  
Shadows overrun the place you play

Names of love we mind along the way  
Seem shallowed by the way we came together

My heart carries on, mmm, but my head knows better  
Troubled by the way we came together

As you breathe  
As you breathe it to life  
You will lead  
You will lead  
As you stray  
As you stray far from home  
I will believe  
I will believe

Cos you are here today, and gone tomorrow  
Basking in the fields of never never  
You want it today, mmm, but I want it forever  
Troubled by the way we came together

My heart carries on, mmm, but my head knows better  
Troubled by the way we came together

As you breathe  
As you breathe it to life  
You will lead  
You will lead  
As you stray  
As you stray far from home  
I will believe  
I will believe Cos you are here today, and gone  
tomorrow
