"Reap what you sow"

Visit "[Reap what you sow](#)" on MotoLyrics.com

Turns out always like that???
You got good intentions and end up just being a twat
Seems you'd do anything to get a laugh
It's tongue in cheek but that can come out brash
You wanna think of people's feelings
A little bit of tact is what you lack
And that shit you were chatting to that bird while your
bird lies at home is just proper slack...

You're gonna reap what you sow
Hear the voice of reason and you don't wanna know
Looking over shoulders and walking on the ropes
Gonna have to face this and see how things go

And it's never until the morning you realise what upon
you is dawning
It's too late mate, the damage is done
Simple maths if you'd have done the sums
Just don't say them gags or realise that she's with
those lads
Or maybe if you'd just answered your phone and
listened to your girl when she said come home
That's all it would have took man, just that little bit of
sense son
And you wouldn't be in this predicament and you
wouldn't be getting run
You better run...

Cos you're gonna reap what you sow
Hear the voice of reason and you don't wanna know
Looking over shoulders and walking on the ropes
Gonna have to face this and see how things go

Uncomplicate this and try and keep it tidy
Why ruin such a damn good party?
So many just like you looking for somebody
They're looking so god damn ready

Sign on the door says there's no escape
Plan your route to avoid a scrape
You'll bump into 'em though and when you do

Seconds out, round two
You always take it that step too far, every time you
seem to raise the bar
Every time you saw ?? past, the selfish move you pulled
off last
And it was funny once man but you're getting kind of
boring
And you've always believed in karma
I guess it's time you started acting calmer

Cos you're gonna reap what you sow
Hear the voice of reason and you don't wanna know
Looking over shoulders and walking on the ropes
Gonna have to face this and see how things go

Uncomplicate this and try and keep it tidy
Why ruin such a damn good party?
So many just like you looking for somebody
They're looking so god damn ready

(They're looking...)
It's time to move your body now
(She's looking...)
It's time to move your body now
(He's looking...)
It's time to move your body now
(they're looking...)
It's time to move your body now

It's time to move your body now...

Uncomplicate this and try and keep it tidy
Why ruin such a damn good party?
So many just like you looking for somebody
We are looking so god damn ready
