

Throw Television "Future"

Visit "[Future](#)" on MotoLyrics.com

The world is burning
Love is hating
The blue sky is becomming gray
And we just keep ignoring

Help us save the world
Help us save the world

Think about the future
The future
Think about the future
The Future

The water is rising
Snow is melting
The blue sky is becomming gray
And we just keep ignoring

Help us save the world
Help us save the world

Think about the future
The future
Think about the future
The Future

Future (x4)
