Music: Giuseppe Bondi

Lyrics: Dario Grillo

When the time calls me through the storms and fires
I will be there to defeat all the liars
'cause there's only one warrior who can face the Hell
and its lord
Without fear and with pride... Am !!

Flames like rain are falling down on my reign
My land is imploring me I must fight
This tragic battle to bring back the glory and the peace
And nothing will be impossible for me
Because there's only one warrior who can face the Hell
and its lord
Without fear and with pride... Am !!

[Chorus]

Great lord give me your angels to fight this battle
Against your evil brother
And when the sun shines on the ground I will pray for
your grace
And when the skies see you on the clouds my steel will
echo around

And when the sun shines on the ground I will pray for
your grace
And when the skies see you on the clouds my steel will
echo around

Now my glory is greater than others
'cause there's only one warrior who can face the Hell
and its lord
Without fear and with pride... Am !!

[Chorus]

Great lord give me your angels to fight this battle
Against your evil brother
And when the sun shines on the ground I will pray for
your grace
And when the skies see you on the clouds my steel will
echo around

This is the story of Thy Majestie Arter, first knight of Hataria, son to Heroid (king of the elves) and to Teresia (queen of Durnovaria). Hataria is a small reign that stands in a forest populated by thousands of creatures, who live in peace preserving a mystery: a millenary tree, guardian of another dimension: the Gates of Return where Draita, Lord of the Damned, and his troops have been sent by the ancient magic of elf Ireen, hundreds of years ago. Now the tree is getting older and its roots cannot stand anymore the power of the Dark Dimension. Thus the forces of Damned, once free, can launch sudden attacks to Hataria. They are looking for Hywelbane, the holy sword, the only one that can fight Draita and close the Dimension. Arter, having noticed what happened, is always ready to fight to keep the peace, and thanks to the help of the fate he shows his bravery. In facts, after having lost his father, killed by the troops of Draita, and having been betrayed by his servant Airo, he will face several battles against the demonic creatures of Draita; for Nymphis Syphirideis sake (Goddess of peace) and thanks to his friends the Elves, he will beat the destiny, bringing back the light to the green lands of Hataria.
