I have cried all night

Trying to make it better

I recognize my pain

Things are getting harder

For us to be in this love

And my tears wash away my smile

And I'm drowning in my sorrow

There's no hope for today

I can't see my tomorrow

ÂiÂ®Cause we are no longer in love

This love, your love, my love

It use to be our love

This love, your love, my love

It use to be our love, love, love

I've been blazed all day

Dreading confrontations

I've waited until now

For this conversation to take place

That we're wasting time

With this love

I'm trying to be nice

Don't want you to be a hater

We've had a beautiful son

So we gotta be one

Sooner or later

ÂiÂ®Cause we've got so much more than this love

This love, your love, my love

It use to be our love

This love, your love, my love

It use to be our love, love, love

Can we still be, can we still be friends

It will all end in tears if we decide

To leave but stay, I'm so confused, I

Can't go on this way, I just can't go on, on this way

This love, your love, my love

It use to be our love

This love, you love, our love

It use to be our love, love, love
