A lonely fortress a desert sea  
The legion holds its emptiness against the country's  
mortality  
Forceful kept soldiers guard the concrete rails  
Serving their lives in the legion or spend their time in  
violent jails  
The watchtower stands the point to view the lands  
The watch guard shall die the first target in the sky  
Legionnaire's fight and death who knows their  
ammunition's running low  
Stand up the corpse to hold their guns they have no  
exit and no place to run  
Fight the fight wrong or right a death sentence on a  
desert night  
Might to might the tower's height the watch guard falls  
in their sights  
Naked steel hand to hand freelance legion meets its  
final stand  
Hear the roar down they go across the sands their  
blood will flow  
A lonely fortress a desert sea  
The legion held its emptiness and lost to mortality  
Forceful kept soldiers died along the rails  
They served their lives in the legion but their purpose  
had sadly failed  
Fight the fight wrong or right a death sentence on a  
desert night  
Fight the fight might to might a death sentence has  
their plight
