["Phantasmagoria is a form of psychological disorder where the victim has visions of ghosts in his/her mind. These apparitions multiply, eventually driving the victim nuts. Weird, eh? All our friends who remember the Phantasmagoria 1986 demo should find this quite happening and very heavy. Cheers!"]

I have chosen you my friend, you're mine  
Locked inside this frightening dream  
Nowhere to hide  
Every night my demons you will see  
An apparition festival, through hell you'll ride

Phantasmagoria  
Sleep well  
Phantasmagoria  
In hell

Some one here is calling out your name  
Look out, I play inside your brain  
Fleeing from my shadows, you'll never pass my test  
Don't you know that ghosts never rest

Phantasmagoria  
Sleep well  
Phantasmagoria  
In hell  
Approaching, you writhe, we take control  
Unholy inquisition, sentence very cold  
My servants, demons, take you down the hole  
Your mind destroyed, now I want your soul

Phantasmagoria  
Sleep well  
Phantasmagoria  
In hell

Phantasmagoria  
Phantasmagoria  
In hell!
