I'm feelin' good vibes all around
And thanks to you guys think I found
What I wanna do with my life
A couple tracks to get it right
But here I stand

And it's all because,
It's all because
It's all because

You that I can share the spotlight
Dreams on fire watching in night
For every hope every wish
Didn't know we'd make it this far...
And this is just the start

It's a new day can you feel it
You take my fears away
I'm feelin' kinda "cray cray"
Cause this moment in time is amazing

And it's all because
It's all because
It's all because

You and I can share the spotlight
Dreams on fire watching in night
For every hope every wish
Wish didn't you we'd make it this far...
And this is just the start

Never been so excited before
'Bout the good life in the open door'
Started with the codac in my room
But now I'm in HD with an eight time zoom

Zoom? zoom? zoom around the world
Anywhere you want my heart is yours
Germany, Australia, Brazil, Singapore
You know I can't wait to meet you on tour

This is incredible
Don't you think...
And I wanna thank you all
Cause you made this happens for me...

You and I can share the spotlight
Dreams on fire watching in night
You and I can share the spotlight
Dreams on fire watching in night

For every hope every wish
Didn't know we'd make it this far
Didn't know we make it this far
You and I can share the spotlight
Dreams on fire watching in nights

For every hope every wish
Didn't know we'd make it this far

And this is just the start
And this is just the start

I'm feeling good vibes all around
It's all thanks to you guys
