Lost hours and secrets too
No one will find but you
And falling is like brand new rain
Places I have never been

I thought these things would come to me
Love is another country

And I wanna go, I wanna go too
Wanna go with you
I wanna go too, wanna go with you
Wanna go with you

But I'm broke down right here
My heart won't come out clear
I get lost on the inside too
How could I make sense to you?

When you walk away from me
You're further than another country
I wanna go, I wanna go too
Wanna go with you
I wanna go too, wanna go with you
Wanna go with you

If you should lose your place
This world should hide its face
And go where you can't follow to
I will come and look for you

You can just hold onto me
Strangers in another country

'Cause I wanna go, I wanna go too
Wanna go with you
I wanna go too, wanna go with you
Wanna go with you, wanna go with you
Wanna go with you, wanna go with you
