

Til Tuesday "Angels Never Call"

Visit "[Angels Never Call](#)" on MotoLyrics.com

Notes: ok - instead of trying to worry about the differences between

G-->gsus, g-->c/g, and g-->am7/g I'm just calling it glick.

The notes in the lick are (in order) g d g b c-c c b with The fifth and sixth tied. the second chord "fits" with any

Of the three except that there isn't an "a" in it per se, But there does seem to be an "e". on the other hand it does

Have the same "tone" as a c/g would have. so I'm punting! :-)

Glick glick glick glick

I used to watch her sleep an angel on vacation

Glick glick glick glick

Glick glick

When they came out at night

I found it locked up tight
