Verse 1:

All our friends keep wondering but they don't know
that...
You and I have secret lives yet they don't realize.
When they aren't looking, we keep on kissing, the fun
we're having...
Hiding our love from the world is driving me insane..

Chorus:

Summer nightfalls with endless dreams...
of you and I together always.
Taking trips and leaving town...
Go to a place where there's no one around...there's no
one around...

Verse 2:

I thank you for all the times when you made me smile.
No matter what happens now you will always be my pal.
We run around and cause a ruckus...we can't stop
laughing.
These memories will fill our lives with hapiness...

Chorus:

Summer nightfalls with endless dreams...
of you and I together always.
Taking trips and leaving town...
Go to a place where there's no one around...there's no
one around...

I thank you for all the times when you made me smile...
no matter what happens now you will always be my
pal....

Chorus:

Summer nightfalls with endless dreams...
of you and I together always.
Taking trips and leaving town...
Go to a place where there's no one around...there's no
one around...
