"Be At Peace"

Visit "[Be At Peace](#)" on MotoLyrics.com

Be at peace and perceive deeper love
Speak only truth and you'll hear
Let no war come before or between to take life away
Why do we have to lose ourselves so foolishly
Whoaâ€¦ no, we never find out why
So let our works carry over, through this time all we
hope for
Be at peace 'til we rise again

So be at peace / keep your mind clear
Release what you rely or defend
You will fear no one who steps on your island
Who would smile and steal your property in silence
Violence has a dreadful purpose
Hands that work this cause more curses
See down further paths we pave
Do they splinter, break-up or do they remain?

So can the people conspire to dream beyond the day-
to-day
We think we see the four walls we design to shutter the
soul
We take these licks in life, belief in right we live with
our pain
Some fight this, making crisis in our way

Some desperate to die I cannot know their pain
Ooo, But the ones who make light of his days will lose
his way
Be at peace and perceive deeper love
Speak only truth and you'll hear
Let no war come before or between to take life away
Why do we have to lose ourselves so foolishly
Whoaâ€¦ no, we never find out why
So let our works carry over through this time all we
hope for
Be at peace 'til we rise againâ€¦

So put your mind where there's room to grow
Don't keep your mind on the needs of just today / an
eventuality

You'll become a slave to speed and personality
Don't put your life in the hands of those
Who terrorize by taking life away from the
Song that we sing everyday
From the sun that we need everyday
Some desperate to die I cannot know their pain
Ooo, but the one who make light of his days will lose
his way
So be at peace and perceive deeper LOVE
Speak only truth and you'll hear
Let no war come before or between to take life away
Why do we have to lose ourselves so foolishly
Whoaâ€¦ no, we never find out why
So let our works carry over through this time all we
hope for
Be at peace 'til we rise againâ€¦

So lift up all your voices and we're singing!
So be at peace and be relief
Just try your best to follow passion and pure happiness
Keep us in love
