"Push Some Air"

Visit "[Push Some Air](#)" on MotoLyrics.com

We don't have another 24 hours to wait
We dream of all we can be- but we just push it away
The more we think we're moving forward we just
keeping the pace
With the light that's fading from the clouds so listen to
me shout
If you can't afford a dollar to take care of the pain
You're gonna need it- how you gonna feed it?
No matter who you gonna tell it to I bet they won't hear
you beg
It's your decision to be part of a solution today

So your beats are broken down they can barely flow
I can't hold my tongue- we just let it blow
So help me to push it out
Use the words of your mouth to get it started- do you
want it?

So we gonna push some air- won't you move your
hands into the air
We gonna shout- ain't gonna stand down
Gonna push some air- won't you raise your voices so
they hear
We gonna shout- scream it out clear
We gonna push some air / come on raise your hands
into the air
Give me the feeling that you're keeping the faith
We gonna push some air / come on raise your voices
so they hear?
We gonna shout / scream it out clearly

Push the music through the speakers to the extreme
The air around us is surrounded by confusion and
greed
The power of our speech release disturbance in your
frequencies
Winds will begin to interfere / clear the air
So if you get too high let me put you back in your place
You're gonna feel that fever's been burning your head
You want to survive the pressure better move your own
weight

If you wanna live, what is the first step that you take?
So your beats are broken down they can barely flow
I can't hold my tongue- we just let it blow
So help me to push it out
Use the words of your mouth to get it started- do you
want it?

So we gonna push some air- won't you move your
hands into the air
We gonna shout- ain't gonna stand down
Gonna push some air- won't you raise your voices so
they hear
We gonna shout- scream it out clear
We gonna push some air / come on raise your hands
into the air
Give me the feeling that you're keeping the faith
We gonna push some air / come on raise your voices
so they hear?
We gonna shout / scream it out clearly

We push the beat so let me see how you like it / Don't
be frightened
So let me speak and we'll feed the fire tonight / making
it brighter
We push the beat so let me see how you like it / Don't
be frightened
We move to set it free / let me feel the vibes excite you
(They can no more stand and push us out of the way)
