### **"Zion Triad"**

Visit "[Zion Triad](#)" on [MotoLyrics.com](http://MotoLyrics.com)

Your boots kick up the dust / and they will for maybe a  
thousand days  
But will never cover blood / it will remain  
You have convicted us / never committed no crime you  
say  
Cannot ever stop this flood I guarantee  
You're so predictable / you make a critical time mistake  
Can't allow the fear to be our fate  
And you will feel the touch of the many who you  
incarcerate  
They will come in greater number, can't you see?

So we come / we can take the battle on  
Break the back of Babylon / children, won't you sing  
along?  
Know the real criminal: they come to you and sell their  
smiling face  
Together we will reveal and see

So won't you join to beat the bastards who betray  
We can no more live in fear underground for better  
days  
We make no noise to keep the dogs where they lay  
We sing to meditate then lay your powers to waste  
x 2

Ready or not,  
We come down from the mountain to investigate the  
story  
Nothing shake the determination from  
People bleeding for the Zion nation / no, it never fall  
They become the weaker state and so they call it  
radical  
For the poor people / situation now critical  
Ignorant speaking / still fighting in the media  
What we're all reaching for / something to deliver us  
Righteous come to defeat all the beatings of the  
prisoner  
Before it's too late  
We control the party / don't forget the promise  
This nation rise up and be ready for the challenge

Heaven put me here to chase away the disease  
Tell the tyrannical we'll send you down to hell on your  
knees

So won't you join to beat the bastards who betray  
We can no more live in fear underground for better  
days  
We make no noise to keep the dogs where they lay  
We sing to meditate then lay your powers to waste

So don't you belittle us / earn the trust  
Or you will fall and return to dust  
Our Triad must rise / please realize  
We're giving you fair warning

Yes, we make the murderer retreat when beaten to  
their hiding place  
See them crumble when they come to feel the pain  
They turn the pressure up / so we keep a lower profile  
and wait  
How much longer can we suffer underneath?  
Who put the barrier in between us where the children  
play  
We were / when they came we looked away  
Are we a warrior? No, we know better than to go that  
way  
For survival we make our own society  
So you speak / shackled to your policy  
Believe our conspiracy will soon see supremacy  
So we gonna raise a cup and dedicate to your final  
days  
The sun will set on the dreams you seek  
So won't youâ€¦!
