We can talk and talk all night  
If you want to that's all right  
Till I've heard every word you've got to say  
Go ahead and take your time  
If you've got something on your mind  
But it won't change the way I feel anyway

That's ancient history to me now  
Something we don't have to talk about  
You know I love you anyhow  
That's ancient history

There's a tale you've got to tell  
How you stumbled and then you fell  
But I guess I knew that all along  
And, my love, there's times when we  
Are weaker than we'd like to be  
And I could tell some stories of my own

That's ancient history to me now  
Something we don't have to talk about  
You know I love you anyhow  
That's ancient history
