addiction, but when you finally did you didn't skip a
beat, or alter =
your inflection. Where do you live? You change your
home so fast, I got =
you penciled in and then you're gone, your hand is out
but I've got =
nothing left to give you, except perhaps some words to
get you through =
this. I'm sick of enabling you and you can sense it, you
glance around =
as if for the cops, whatever you've stolen I won't fence
it, you know =
you're nothing without your props.
